Prof. Vijay Gopal Kovalli
Research Professor, CiSTUP
IISC Bengaluru
Bengaluru, Karnataka, India

Dear Vijay Sir,

Position applying for: Summer Research Intern- Data Analyst & Visualization at CiSTUP

Everyone tells me data analytics roles are similar across industries. However, after researching CiSTUP's groundbreaking work on sustainable urban mobility, it has become clear to me that the research being conducted at CiSTUP is highly valuable. Further, your research experience & contribution at MoveSmart Transit and Traffic (MoSTT) lab has fascinated me, and I would be very glad to provide my Data Analytical skillset in real-world projects.

What excites me most about CiSTUP is the opportunity to work with real-world transportation data that directly impacts millions of urban commuters. Having analyzed **\$441.41M in sales data across 45+ vendors** and built interactive Power BI dashboards with 25+ visualizations, I've developed not only robust analytical skills but also **a passion for transforming complex datasets into actionable insights**.

In my recent vendor performance analysis, I worked with **500K+ data points across 45+ vendors, generating \$134.07M in profit insights with 38.72% margins**. This experience taught me the importance of rigorous data validation and stakeholder communication skills, which are directly applicable to CiSTUP's research methodology. My ability to handle multi-source data integration and create executive dashboards that track 10+ KPIs aligns perfectly with your dashboard development requirements.

Additionally, my role as IEEE VITB Student Branch, Treasurer & Student Partner Representative involved managing budgets for 10+ events with 100% financial transparency, demonstrating the stakeholder coordination and documentation skills essential for field data collection and institutional partnerships.

Thank you for your time and consideration. My analytical expertise, coupled with my genuine interest in urban sustainability research, would make me a valuable addition to CiSTUP's data analytics team. I would welcome the opportunity to discuss how my experience with large-scale data analysis can contribute to your ongoing transportation research projects.

Yours sincerely,

Vasu Agrawal

Final Year Undergraduate student,
B.TECH in Computer Science & Engineering, VIT Bhopal
